espresso wakes up the world

Frontloader + Paper Cup Dispenser + WMF 1300

## Professional technology to enter the world of espresso

An espresso machine is perfect if it does exactly what you need. The new WMF 1300 is designed for low to medium demand and is every bit equal to its big brothers in terms of quality and ease of use.

Its modern design, intuitive operation, a revolutionary cleaning concept, proven professional technology, service for which WMF is known and the price will set the WMF 1300 far above. Your diners, customers and staff will be won over by the WMF 1300 with a virtually unlimited selection of espresso based beverages and exceptional quality.

### Flexible

#### Virtually Unlimited Beverage Selections

From Chocolate to Cappuccino to Latte and Fresh Coffee, there are over 30 different programmable beverages in any size up-to 12 fl oz.

### Modular

#### 3 basic configurations

The WMF 1300 is available in three basic models. Each model can be customized with the addition of numerous options

### Efficient

#### Well thought-out hoppers

The bean and powder hoppers can be easily closed with the turn of a knob. Enabling removal for easy cleaning and refilling, with no waste.

### Easy to Clean

#### Automatic cleaning

With the patented Plug and Clean System, cleaning and descaling are performed with the touch of a button. No more daily liquid chemicals or contamination from employees.

### Practical

#### Clever button allocation

Button labelling is both easy to understand and can be completely customized. Simply replace the slide in labels with labels printed on your computer.
